

AEON

CENTRE FOR REGENERATIVE WELLNESS

The Journey To Self-Healing & Longevity Through Science

THE AEON CLINIC

The AEON Cellular Reset

The AEON Cellular Reset is our proprietary approach to renewal—an integrated method designed for individuals who value discretion, precision, and measurable outcomes.

At its core, it reflects a fundamental belief: that ageing is not a fixed trajectory, but a biological process that can be understood, guided, and optimised.

Through a structured, science-led methodology, we examine how your body functions at a cellular level—identifying the underlying drivers of fatigue, inflammation, imbalance, and accelerated ageing.

This begins with an in-depth clinical consultation, exploring your health history, lifestyle, stress load, sleep, emotional wellbeing, and performance goals. It is followed by advanced diagnostics—including genomic insights, metabolic and hormonal profiling, cellular markers, and imaging where appropriate—creating a complete picture of your internal biology.

Using this intelligence, our medical team applies a systematic, personalised approach that integrates regenerative medicine, targeted clinical therapies, and lifestyle optimisation—designed to restore balance, enhance performance, and support long-term health.

Guided by a dedicated medical concierge, your journey is continuously refined and supported—ensuring consistency, precision, and measurable progress, wherever you are in the world.

OUR VISION

“The measure of success is the capability to change people’s lives for the better.”

Dr. Jaffer Khan

DR. JAFFER KHAN, FOUNDER

OUR TRIED AND TESTED METHOD

The AEON Approach

Welcome to a new era of longevity, where science and wellness converge to restore vitality and elevate the human experience. At AEON, ageing is viewed not as an inevitable decline but as a biological process that can be guided, optimised, and reversed through regenerative medicine.

We combine stem cell therapy, ozone therapy, functional genomics, precision diagnostics, and advanced wellness treatments to help you live healthier for longer. AEON is the region's first regenerative wellness clinic offering physician-led, personalised care into a luxury-integrated model designed for lifelong health. AEON is affiliated with the American Board of Regenerative Medicine and the Geneva College of Longevity Science, reflecting our commitment to international standards, evidence-led practice, and world-class medical oversight.

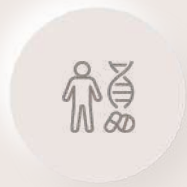

Consultation

Your experience at AEON Clinic begins with a thorough consultation that encompasses a comprehensive review of your medical history as well as a detailed physical assessment.

Analysis

Upon consulting with our medical team, we will conduct a comprehensive array of advanced medical tests to gather a complete baseline of information about your current health condition.

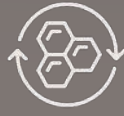

Systematic Treatments

Based on a thorough assessment of your health, our medical team will create a personalised treatment plan that caters to your unique health status. Our patient centric approach considers various aspects of your well-being, enabling us to help you achieve transformative results.

Medical Concierge

After the completion of the initial treatment plan, our healthcare experts will provide guidance for a follow-up program, aimed at sustaining your overall well-being. Our plan is designed to support and maintain the progress you have achieved.

THE TREATMENTS

Regenerative Medicine

Stem Cell Therapy

Using the body's own healing intelligence, stem cell therapy restores tissue integrity, reduces inflammation, and reverses visible signs of ageing. AEON offers intravenous, intra-articular, and intradermal stem cell treatments designed to rejuvenate the body from within.

Exosome Therapy

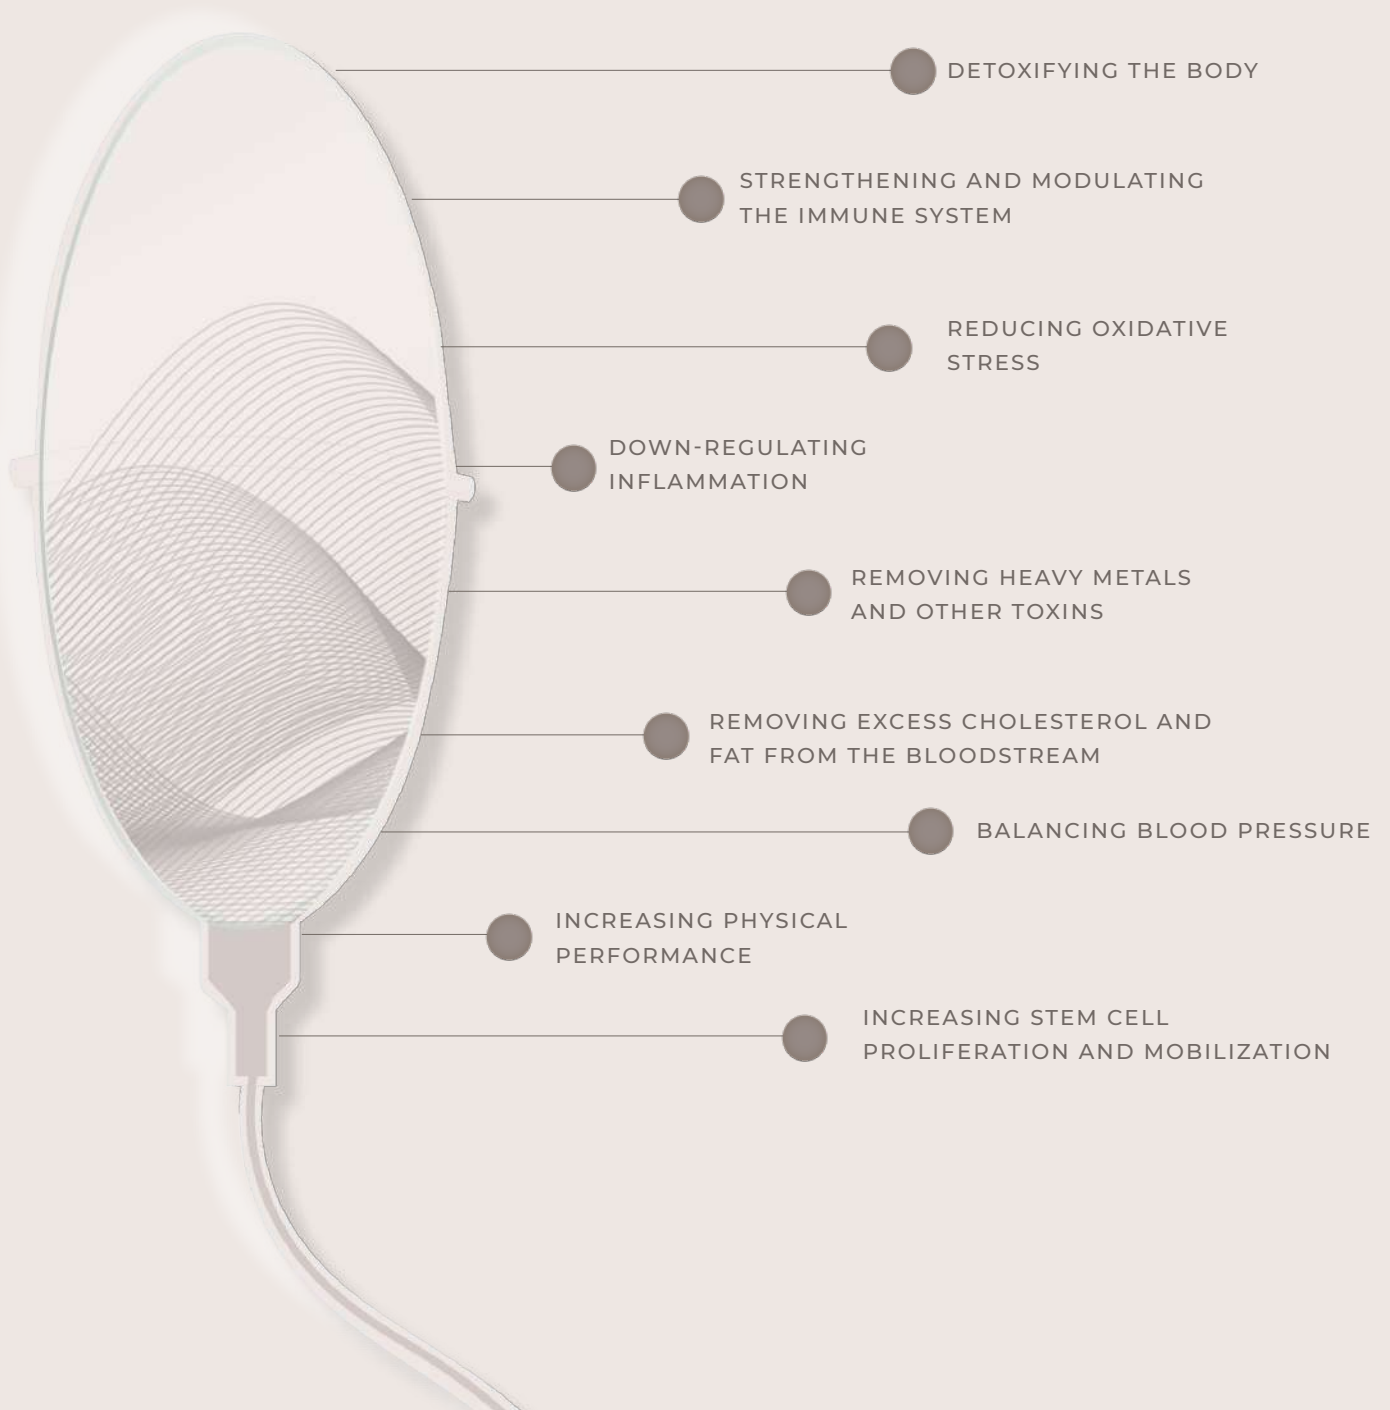

Exosomes deliver powerful growth factors and bioactive molecules that enhance tissue repair, improve skin and hair quality, restore cellular communication, and support whole-body rejuvenation.

Dr. Basanta Khatri-Chhetry

Ozone Therapy

Ozone Multi-Pass Therapy is an advanced blood optimisation treatment designed to support systemic detoxification, improve circulation and oxygen utilisation, help regulate inflammation, and strengthen immune resilience—often translating into better physical stamina, mental clarity, and overall performance. When delivered via EBOO (Extracorporeal Blood Oxygenation and Ozonation), the protocol combines precision filtration with controlled ozone exposure to help cleanse the bloodstream and support more efficient recovery and cellular function.

THE TREATMENTS

Functional Genomics

Genomic Medicine & Longevity Genetics

Our Genomic Medicine Program explores how your unique genetic blueprint shapes your health, ageing process, and long-term wellbeing. By studying individual genes and their influence on biological pathways, genomic medicine enables early diagnosis, disease prediction, and truly personalised medical care. Our approach includes advanced anti-aging and genetic optimization strategies designed to enhance cellular function, improve health span, and support a longer, healthier life.

One of our key offerings is the Longevity DNA Wellness Test, a cutting-edge analysis that examines specific genetic markers (SNPs) linked to ageing, resilience, detoxification, metabolism, and lifespan. This comprehensive test provides deep insight into how your genes affect your longevity potential and concludes with a ranked, personalized roadmap of clinical recommendations tailored to your health priorities. Under the care of Dubai's leading clinical geneticists, AEON empowers you to understand your genetic profile and take proactive steps toward optimizing your future health.

Sports Medicine

A regenerative, performance-oriented approach focused on healing injuries, enhancing mobility, and supporting athletic longevity through stem cells, PRP, exosomes, ozone therapy, and advanced recovery technologies.

Physiotherapy & Rehabilitation

AEON's physiotherapy programs use regenerative techniques to restore movement, relieve pain, and strengthen musculoskeletal health. Each plan enhances recovery, prevents injury, and supports long-term mobility.

THE TREATMENTS

Regenerative Wellness

Airpod Oxygen Therapy

A pressurised oxygen environment that enhances tissue repair, boosts cognitive performance, strengthens immunity, and improves circulation.

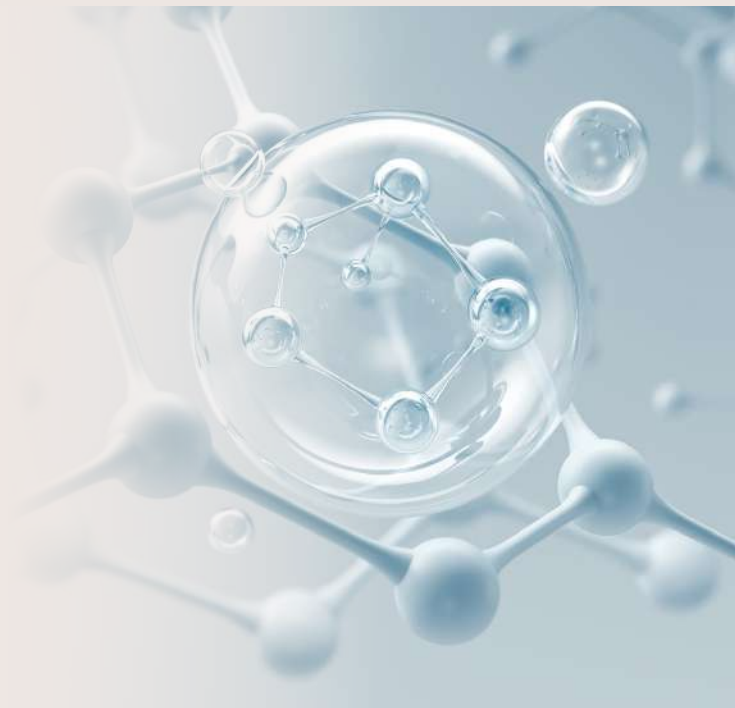

IV Vitamin Therapy

Precision-designed infusions that nourish the body at the cellular level—improving energy, detoxification, cognitive clarity, hydration, recovery, hormonal balance, and immune health.

Peptide Therapy

Bioactive peptides tailored to support tissue repair, metabolic optimisation, cognitive enhancement, hormonal regulation, and anti-ageing.

Photobiomodulation & PEMF Therapy

Light and electromagnetic stimulation regulate inflammation, elevate mitochondrial activity, accelerate healing, and restore neurological balance.

IV Laser Therapy

Multi-wavelength intravenous laser therapy enhances mitochondrial function, improves circulation, combats inflammation, and restores cellular energy.

INFRARED

Infrared light penetrates deep into tissues, promoting cellular regeneration, reducing inflammation, and aiding in pain relief

RED

Red light therapy administered intravenously can improve blood circulation, stimulate the production of energy in cells, and support wound healing and tissue repair

YELLOW

Yellow light therapy delivered intravenously can help enhance lymphatic function, boost mood, and improve overall mental well-being

BLUE

Blue light therapy administered intravenously may have antimicrobial properties and can aid in reducing inflammation, regulating immune response, and promoting detoxification

GREEN

Green light therapy administered intravenously can assist in calming the nervous system, reducing anxiety and stress, and supporting overall relaxation and balance

Metabolic & Weight Management

A precision-led, multidisciplinary approach to metabolic health—designed to address the root causes of weight imbalance, metabolic dysfunction, and long-term disease risk.

At AEON, metabolic care goes beyond conventional weight management. We focus on restoring how the body functions at a cellular level—targeting key drivers such as insulin resistance, hormonal imbalance, chronic inflammation, and mitochondrial inefficiency.

Through advanced diagnostics, including metabolic, hormonal, genetic, and body composition analysis, we develop a comprehensive understanding of each individual's biology. This allows our multidisciplinary team to design highly personalised programmes that integrate clinical nutrition, functional medicine, regenerative therapies, and behavioural support.

Our structured, medically supervised approach supports sustainable weight optimisation, improved energy, and enhanced metabolic resilience—while addressing the broader spectrum of cardiometabolic health.

Because metabolic health is not simply about weight—it is about restoring balance, function, and long-term wellbeing.

Mental Health & Stress Management

Our Mental Health, Psychiatry & Neuroscience Department integrates advanced brain science, personalized medical care, and a premium clinical experience to support emotional wellbeing, cognitive performance, and long-term mental resilience.

We are home to EXOMIND™ TMS, an FDA-cleared and CE-certified neurotechnology combining neuroscience with next-generation AI to deliver personalised Repetitive Transcranial Magnetic Stimulation (rTMS). This non-invasive therapy stimulates targeted brain regions responsible for mood, focus, and emotional regulation—offering a highly effective, drug-free solution for conditions such as depression, anxiety, OCD, ADHD, PTSD, sleep disturbances, brain fog, and treatment-resistant mental health concerns.

Our department also offers comprehensive psychiatric services, led by experienced mental health physicians who provide thorough diagnostic assessments, medication management (when required), and structured therapeutic plans. Together, our Psychiatry, EXOMIND™ TMS offerings create a complete ecosystem for mental optimization—allowing individuals to feel clearer, calmer, more focused, and more empowered in their daily lives.

Female Wellness

Women experience a range of physiological changes over time—often affecting comfort, confidence, and overall quality of life. Our Female Regenerative Wellness Program is designed to restore vitality by enhancing tissue health, function, and resilience through advanced regenerative medicine. Using cutting-edge, non-invasive therapies, we help rejuvenate tissues that may naturally decline with age, hormonal changes, childbirth, or lifestyle factors.

As a trusted destination for women's wellness, AEON combines medical innovation with personalized care to support intimate health, hormonal balance, and overall wellbeing. Each treatment is delivered with exceptional clinical expertise and discretion, empowering women to feel healthier, more confident, and more connected to their bodies at every stage of life.

Male Wellness

As men age, they often experience a range of health concerns—from low testosterone and reduced vitality to sexual health challenges and hair loss. At AEON Clinic, we approach male wellness through the lens of regenerative medicine, offering advanced, science-led treatments designed to restore function, improve performance, and enhance overall wellbeing.

Our Men's Regenerative and Sexual Health Program is built on the expertise of a multidisciplinary team of urologists, andrologists, and regenerative medicine specialists. This department provides comprehensive, discreet, and evidence-based solutions in a luxurious, private environment, ensuring every patient receives deeply personalised care. Our services encompass regenerative and injectable therapies, shockwave and stem cell treatments, and precision surgical solutions, all designed to improve circulation, promote tissue regeneration, balance hormones, and support confidence at every stage of life.

Male wellness is not just about treatment—it is transformation. We combine innovation, medical precision, and tailored guidance to help men reclaim their energy, performance, and vitality.

Aesthetic Treatments

Face Art™, RestorLift™, Injectables, Biostimulant Fillers, Threads, BBL, Morpheus8, HydraFacial, Peels & Lasers, Fotona 4D Lift, Tummy Tuck, Liposuction, Mummy Makeover, Breast Surgeries, Facial Surgeries, Non Surgical Skin Lifting and Tightening

Hair Restoration

Regenera Activa, Exosomes, PRP, Mesotherapy, Hair Transplant.

Centers of Excellence

A dedicated approach to complex conditions— integrating advanced diagnostics, specialist expertise, and personalised therapeutic strategies.

Neck & Back Pain Management

A multidisciplinary approach to spine health—designed to address the underlying causes of neck and back pain with precision and long-term focus.

At AEON, we move beyond symptom management to understand the structural, neurological, and lifestyle factors contributing to discomfort and reduced mobility. Through advanced clinical evaluation and imaging where required, we identify the root drivers of pain—whether acute, chronic, or degenerative.

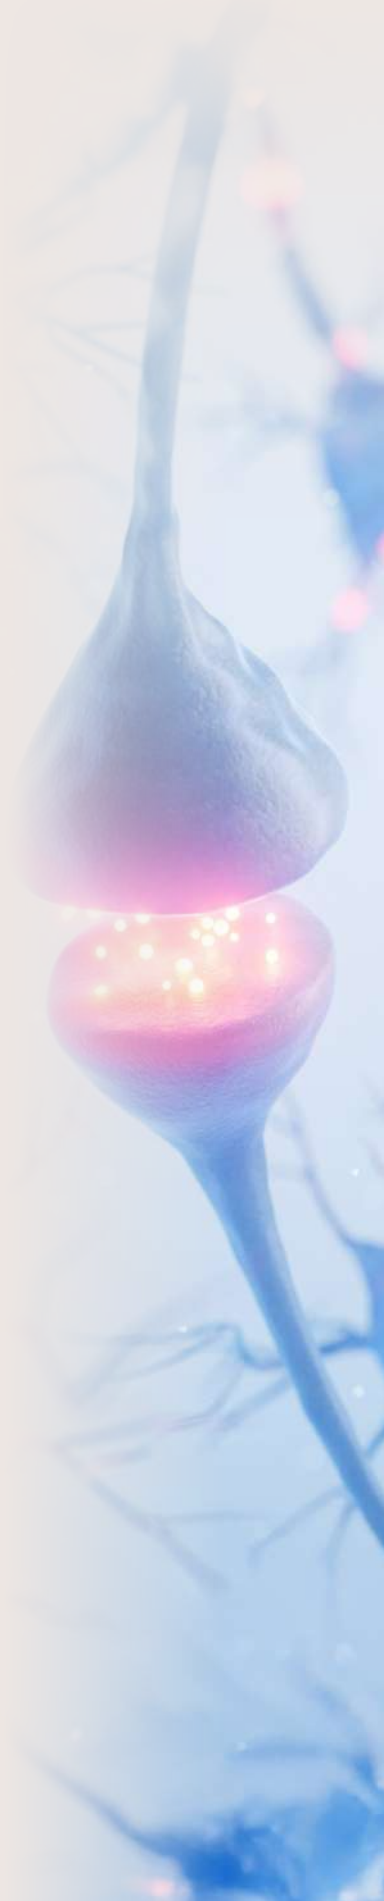

Our approach integrates specialist consultations, regenerative therapies, physiotherapy, and targeted interventions—supporting tissue repair, reducing inflammation, and restoring functional movement. Each programme is personalised to optimise recovery, enhance mobility, and prevent recurrence. Because lasting relief is not temporary—it is built on restoring how the body moves and functions.

Headache Management

A specialised, integrated approach to the diagnosis and management of headaches and migraines—designed to restore clarity, comfort, and quality of life.

At AEON, we recognise that headaches are often multifactorial, influenced by neurological, vascular, hormonal, and lifestyle factors. Our approach begins with a detailed clinical assessment to identify underlying triggers and contributing drivers. We combine medical management with advanced therapies—including neurostimulation, regenerative support, and lifestyle optimisation—tailored to reduce frequency, intensity, and long-term disruption.

Each programme is designed to support both immediate relief and sustained neurological balance. Because persistent headaches should not define how you live— they should be understood, managed, and addressed at their source.

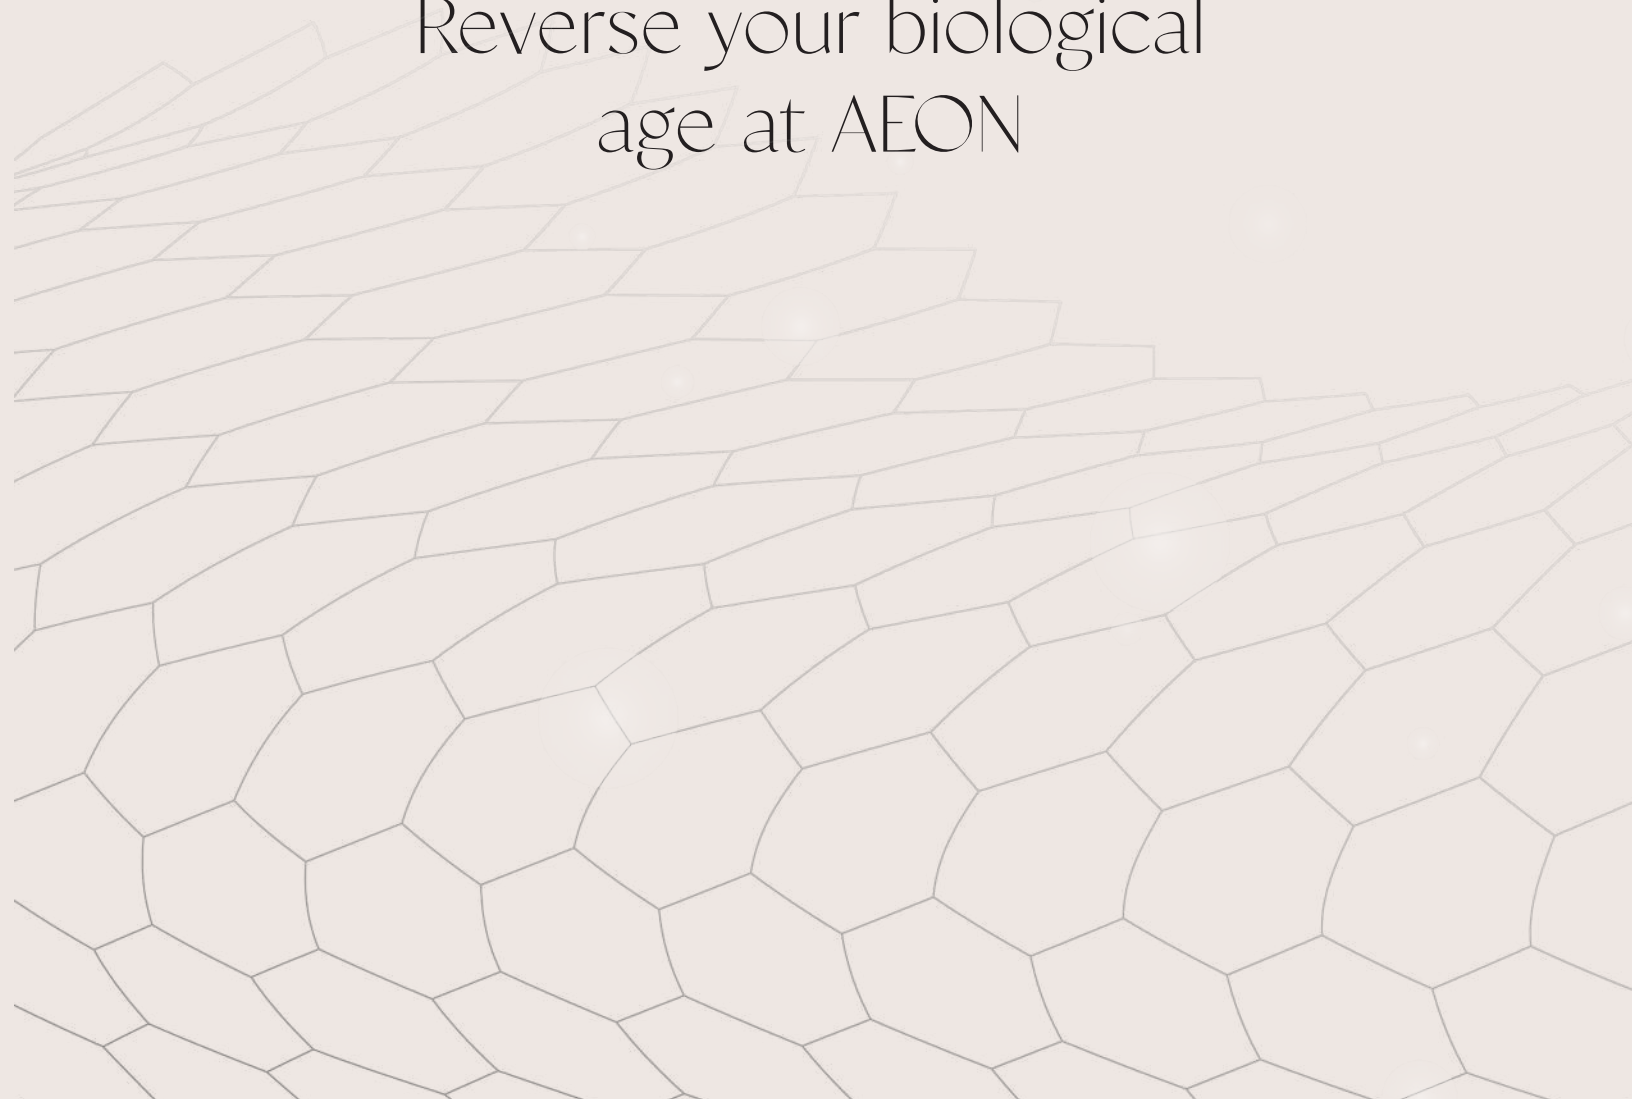

STATE-OF-THE-ART SURROUNDINGS

Transformative Wellness

AEON is located in the new iconic landmark of Dubai, Atlantis The Royal. We welcome you to an experience that will completely redefine your perspective of luxury. Crafted by the world's leading designers, architects and artists, this is a destination where everything has been designed to challenge the boundaries of imagination. We have specifically designed our layout and ambience to cater to clients' emotions, comfort and privacy needs. We want our clients to be able to feel relaxed and in a tranquil state of mind during their visit.
